¹ The electric power sector (electric utilities and independent power producers) comprises electricity-only and combined-heat-and-power (CHP) plants whose primary business is to sell electricity, or electricity and heat, to the public—i.e., NAICS 22 plants. Through 1988, data are for electric utilities only.

² Included in "Other."

R=Revised. P=Preliminary. E = Annual estimate based on eleven months of data. — = Not applicable.

(s)=Less than 0.5 thousand barrels per day.

Notes: • Sales data are adjusted to equal the Energy Information Administration (EIA) volume estimate of products supplied in the U.S. marketplace (see Table 5.11). Distillate Fuel Oil is adjusted at the

Petroleum Administration for Defense (PAD) district level. Residual Fuel Oil from 1984-1989 is adjusted at the PAD district level. From 1990 forward it is adjusted at the national level. Kerosene from 1984-1991 is adjusted at the PAD district level. From 1992 forward it is adjusted at the national level. Additional information is available in EIA's report *Fuel Oil and Kerosene Sales*. • Totals may not equal sum of components due to independent rounding.
